Professional Summary

Azure AI Engineer with 2+ years of experience designing and deploying enterprise-grade Generative AI, Retrieval-Augmented Generation (RAG), and end-to-end Machine Learning solutions on Microsoft Azure. Strong expertise in Azure OpenAI, Azure AI Search, Azure Machine Learning, Python, LangChain, secure cloud architecture, and production AI systems. Proven ability to build scalable, compliant, high-impact AI products for enterprise clients.

Experience

LTIMindtree

Oct 2023 – Present
Hyderabad, India

Cloud Engineer – Azure AI, ML & Generative AI

- Designed and deployed production-grade Generative AI applications using Azure OpenAI Service, prompt engineering, and Retrieval-Augmented Generation (RAG).
- Built intelligent search solutions using Azure AI Search with vector embeddings, semantic ranking, and document retrieval pipelines.
- Integrated Azure AI services including Document Intelligence, Vision, Speech, and Language into enterprise workflows.
- Developed and orchestrated ML pipelines in Azure Machine Learning for data ingestion, model training, endpoint deployment, and monitoring.
- Implemented secure cloud architecture using RBAC, Private Endpoints, managed identities, and network isolation.
- Improved system reliability and response quality through payload optimization, monitoring, and continuous tuning.
- Collaborated with cross-functional teams to translate business requirements into scalable AI solutions.

Projects

Enterprise GenAI Chatbot with File Search

- Developed an enterprise chatbot using Azure OpenAI and Azure AI Search for document-based question-answer.
- Built OCR and data extraction pipelines using Azure Document Intelligence for structured and handwritten files.
- Created searchable vector indexes to enable accurate contextual retrieval.
- Optimized prompts and model behavior to improve response relevance and user satisfaction.

Speech-Enabled Healthcare Assistance

- Built a voice-enabled healthcare assistant using Speech-to-Text, Text-to-Speech, and LLM workflows.
- Indexed healthcare knowledge bases for symptom-based retrieval and recommendations.
- Enabled doctors with faster access to relevant insights through AI-generated suggestions.

End to End Azure ML Model Lifecycle and Deployment

- Built complete ML workflows from raw data ingestion to trained model deployment using Azure Machine Learning.
- Deployed models as Managed Online Endpoints for real-time low-latency inference.
- Implemented observability using Azure Monitor and Log Analytics dashboards.

Technical Skills

Programming: Python, SQL, KQL, C/C++, Java

AI / ML: Machine Learning, NLP, LLMs, Generative AI, RAG, Prompt Engineering, Fine-Tuning, LangChain

Azure: Azure OpenAI, Azure AI Search, Azure Machine Learning, Document Intelligence, Content Understanding, Vision, Speech, Language, RBAC, Private Endpoints, Monitoring

Tools: Azure CLI, Git, GitHub, CI/CD

Databases: Azure SQL, SQL, KQL, Vector Search

Certifications

- Azure (AZ-900: Azure Fundamentals, AI-900: Azure AI Fundamentals, AI-102: Azure AI Engineer Associate, DP-100: Azure Data Scientist Associate)
- Oracle (OCI AI Foundations Associate, OCI Generative AI Professional, Oracle AI Vector Search Professional, OCI Data Science Professional)
- Google Cloud Platform (Generative AI Leader)

Education

- | | |
|---|-----------------------|
| • Guru Nanak Institute of Technology, Kolkata | July 2019 - June 2023 |
| B.Tech : Computer Science and Engineering (CSE) | CGPA: 8.67 |

Additional Information

- Available for AI Engineer, ML Engineer, Applied AI Engineer, Generative AI Engineer, and Cloud AI roles.
- Open to relocation and hybrid/remote opportunities.
